DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: A system for detecting contaminants in or on objects comprising a moveably mounted container for holding objects and having a plurality of perforations and an entrance opening through which objects may be placed into said container, in combination with all other limitations of the independent claim, as well as the method of using said container for detecting contaminants, is not disclosed nor deemed obvious in view of the prior art of record. The prior art does not disclose or seem to reasonably suggest or render obvious, the use of a perforated container for contaminant testing whereby you are testing for contaminants for articles inside said container.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The examiner has cited additional references that are deemed as pertinent to the general state of the art of the present invention.
